## *Great oaks from tiny acorns grow*

### School Food Policy for Packed Lunches (brought in from home)

#### **Context**

As part of the Government's approach to reducing childhood obesity, a Cross Government Strategy for England, *Healthy Weight, Healthy Lives* was launched in January 2008. This strategy outlines an expectation on all schools.

To promote a culture of healthy eating the government now expects all schools – in consultation with parents/carers, pupils and staff to adopt whole school food policies. In particular, schools will be expected to:

- develop healthy packed lunch policies, so that those not yet taking up school lunches are also eating healthily

#### **Introduction**

To grow and stay healthy children need to eat a nutritionally well balanced diet. Schools are an influential setting and can contribute significantly to improving the health and well-being of pupils.

Good nutrition in childhood can help to prevent a variety of health problems, both in the short term and later in life. There is increasing concern that many children are consuming too much fat, sugar and salt and too little fibre, fruit and vegetables.

Packed lunches can contribute to almost a third of a child's weekly food intake and therefore need to be balanced and nutritious.

#### **Aim**

To ensure that packed lunches (brought in from home) reflect standards for school meals introduced in September 2006.

#### **Rationale:**

- Schools are required to positively promote the health and well being of its pupils. Work around healthy eating is a high priority of the Every Child Matters agenda.
- The content of lunchboxes needs to reflect the requirement of schools to meet minimum food and nutrition standards for school meals.
- The contents of lunchboxes in some schools can be extremely unhealthy, recent audits of lunchboxes have shown that in the main they contain foods with high levels of fat, sugar and salt, and very few fruit and vegetables.
- To encourage healthy eating habits from an early age and improve the overall nutrition of pupils
- The short term effects of unhealthy packed lunches and food intake can include poor growth, tooth decay, obesity, anaemia, constipation, poor concentration and behavioural problems which may have an impact on a child's learning.
- The longer term effects of a poor diet in childhood can be an increased risk of stroke, cancer, heart disease and diabetes in adulthood.

## Objectives

- To improve the nutritional quality of packed lunches in schools and the eating habits of children at lunchtimes
- To develop an awareness in pupils, parents, staff and the wider community that the school takes a proactive approach to promoting healthy eating.
- To encourage healthy eating habits in childhood that can influence health and well being in later life.
- To ensure that food brought into school (packed lunches) reflects and meets food standards for School Food (2006).

## Implementation

This packed lunch policy fits within a wider context of promoting a whole school approach to food and healthy eating.

- Children's packed lunches should be based on the 'Eatwell Guide' model which shows items the 5 main food groups; (Food Standards Agency).

### **Bread, Rice, Potatoes, Pasta**

These starchy foods are a healthy source of energy. Packed lunches should include 2 or more portions.

### **Fruit and Vegetables**

These foods provide vitamins, minerals and fibre. Lunches should include at least 1 portion of fruit and 1 portion of vegetables / salad, or more.

### **Milk and Dairy foods**

These foods provide calcium for healthy bones and teeth. Include 1 portion at lunch

### **Meat, Fish, Eggs, Beans**

These foods provide protein for growth. Packed lunches should include 1 portion of these foods

### **Foods and drinks high in fat and / or sugar**

It is important not to fill up on too many foods that are high in fat and / or sugar at the expense of other more nutritious foods. Limiting high fat and sugar foods will help protect young people from becoming overweight as well as helping prevent tooth decay, heart disease, stroke, and diabetes. ***This is why sweets, energy drinks and fizzy drinks are not allowed in packed lunches brought to school. We ask that the following items are restricted in a packed lunch and must only include one of the following: chocolate, crisps, cereal bars, fruit bars, toffee/salted popcorn.***

**Drinks – any drinks provided in lunch boxes should only include either plain water, milk (semi-skimmed), unsweetened fresh fruit juice, diluted fresh fruit juice, fruit or dairy based smoothies, squash (preferably reduced sugar variety) Water will be available in school, as it is for children who stay for school dinners.**

**We also need to restrict some items due to allergies of children who attend our school. Therefore nuts or any products containing nuts are not allowed in packed lunches. This is to ensure the safety and well being of all children.**

**We advise that grapes are chopped in half, length ways, to reduce the risk of choking.**

Additional information is available with ideas and examples of foods that can be included in packed lunches.

**School Food Trust** [www.schoolfoodtrust.org.uk](http://www.schoolfoodtrust.org.uk)

## **Waste and Disposal**

The school will, within reason, send any uneaten packed lunch food items back home. The rationale for this is that parents can also monitor what their child has consumed during the day and then raise any concerns over their child's food intake with the school.

## **Promotion of Healthy Packed Lunches**

There will be ongoing promotion of the need to provide healthy packed lunches through:

- Pupil, parent / carers newsletters
- School prospectus / brochure
- Whole School / Packed Lunch Policy
- Health weeks / healthy eating activities
- Curriculum content
- Parents evenings
- Discussion through School Nutrition Action Group (SNAG)
- School website
- Reward schemes
- Professional development for school staff
- Workshops for parents
- Advice and guidance from the school nurse
- School involvement in National Healthy Schools Programmes and initiatives
- 'Pack A Punch In Your Lunch' guide to healthy packed lunches

## **Packed Lunch Containers**

It is the responsibility of the parents / carers to provide an appropriate packed lunch container where food items can be stored securely and appropriately until the lunchtime period. Parents are advised to include an ice pack. Food products prepared and stored in ambient temperatures after a period of time can have increased levels of bacteria in them.

## **Storage of Packed Lunches**

The school will provide storage area / facilities for packed lunch bags, in the most convenient and appropriate place possible. ***However, the school cannot provide cooled storage areas and therefore cannot take legal responsibility for foods prepared at home and then brought into school.***

## **Dining Facilities for Pupils Bringing Packed Lunch**

Children who bring packed lunches to school eat at the same time and in the same area as children who have school dinners.

## **Monitoring and Evaluation**

The school will carry out monitoring of packed lunch provision - where there may be concerns over a child's food / nutrition intake and / or content of packed lunches, this can be dealt with timely and sensitively, through discussion with parents/carers.

OfSTED are required to report on how the school promotes the personal development and wellbeing of all pupils – this may include food provision including packed lunches brought into school.

The Local Authority will work with the school to review packed lunch provision and will provide advice and support to members of the school community.

### **National Healthy School Programme (NHSP)**

In order to achieve National Healthy Schools Status, schools are required to:

- “ensure healthier food and drink options are available and promoted in breakfast clubs, at break and at lunchtimes – as outlined by Food in Schools guidance”
- “monitors pupils’ menus and food choices to inform policy development and provision”

Schools that have achieved National Healthy School Status (NHSS) may be monitored as part of a national and local quality assurance process.

### **Policy Review**

This policy will be reviewed as part of the schools agreed policy review process. In addition, any major legislative or governmental changes regarding school food may lead to this policy being amended.
